PROFESSIONAL SUMMARY

Java Developer fresher with hands-on experience building **production-grade applications** using Spring Boot, Spring Security, MySQL, Redis, and Docker. Skilled in JWT authentication, role-based access control, AI integration (Ollama LLM), async processing, and full-stack development with React.js. Built an **AI-powered log analysis platform** with automated root cause detection, email notifications, SHA-256 duplicate detection, and multi-format file processing. Strong understanding of OOP, Data Structures, REST API design, Exception Handling, and clean code architecture.

TECHNICAL SKILLS

Languages	: Java
Backend	: Spring Boot, Spring Security, Spring Data JPA, Spring Async, Hibernate
Frontend	: React 18
Database	: MySQL, Redis, Flyway Migrations, JPA/Hibernate ORM
Security	: JWT Authentication, BCrypt, RBAC (USER/ADMIN), Token Blacklisting
AI / LLM	: Ollama, TinyLlama/Mistral, Strategy Design Pattern for AI switching
Tools	: Docker, Docker Compose, Git, GitHub, Swagger/OpenAPI 3, Postman, AWS EC2
Core CS	: Data Structures & Algorithms, OOP, Multithreading, Exception Handling, Design Patterns

PROJECTS

Log Analyzer | *Java, Spring Boot 3, Spring Security, MySQL, Redis, Ollama, React, Docker*

Built complete **AI-powered log analysis platform** — upload, parse, and analyze application logs with automated AI insights
Integrated **Ollama (TinyLlama LLM)** for automated root cause analysis and error summarization of application failures
Implemented **SHA-256 content-based duplicate file detection** — prevents redundant processing regardless of filename
Designed **JWT + BCrypt + Redis** authentication with Role-Based Access Control (USER/ADMIN) and token blacklisting on logout
Built **async log processing** using Spring @Async with ThreadPoolTaskExecutor supporting 100+ concurrent requests
Supports multi-format files: **.log, .txt, .json, .pdf** with PDFBox text extraction and intelligent fallback parsing
Implemented **email notifications** (Gmail SMTP) — critical error alerts and file processing completion emails
Added **Redis-based search history**, CSV export, date-range analytics filter, file delete, and user profile management
Designed optimized MySQL schema with **Flyway migrations and proper indexing** on severity, timestamp, and error_hash columns
Built **Global Exception Handler, Audit Logging, Rate Limiting** and complete Swagger/OpenAPI 3 documentation
Developed **premium glassmorphism React frontend** with analytics charts, file upload, log viewer, and admin dashboard
Applied **Strategy Design Pattern** for AI provider switching — swap Ollama with OpenAI/Gemini via single config change

College Gate Pass System | *Java, JDBC, HTML, CSS, JavaScript, MySQL*

- Built a web-based application for managing student gate pass and leave requests digitally
- Implemented **multi-level approval workflow** between Student, Parent, and Admin roles
- Integrated email notifications for request approval updates and real-time status tracking
- Used JDBC for backend database connectivity and MySQL for persistent data storage
- Designed responsive frontend pages using HTML, CSS, and JavaScript

EDUCATION

Sage University

Bachelor of Technology in Computer Science Engineering — CGPA: 8.2

2022 – 2026

Indore, Madhya Pradesh

Ceyone Ray International School

Class 12th — Percentage: 67%

2022

Khirkiya, Madhya Pradesh

St. Jude's Co-Ed School

Class 10th — Percentage: 91%

2019

Khirkiya, Madhya Pradesh

ACHIEVEMENTS

- Built **enterprise-grade AI-powered project** covering full SDLC: design, development, testing, and deployment
- Applied **Strategy Design Pattern** for AI provider switching — production-level architecture decision
- Strong understanding of Data Structures, Algorithms, and Object-Oriented Programming concepts
- Actively learning backend system design, Docker deployment, and cloud concepts using AWS EC2
- Practiced secure API development: JWT blacklisting, BCrypt hashing, CORS, and input validation

CERTIFICATIONS

- Introduction to Java
- Spring Boot and REST API Development
- Backend Development Practice Projects
